

### *Registering and Pairing your cellular phone*

You can register up to 5 cellular phones.

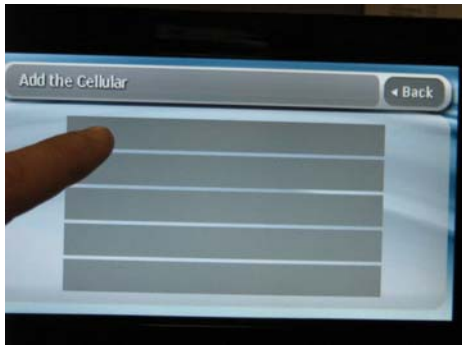

1. Turn on the power of the cellular phone you wish to register and then enable the Bluetooth function.
2. Touch the [**Menu Key**] on the control panel of the MAX685BT or VRX785BT.
3. Select [**BT Phone**].
4. Touch the [**Cellular**] key to display the Cellular Select screen.

5. Touch the [**Add**] key to display the 'Add the Cellular' screen.

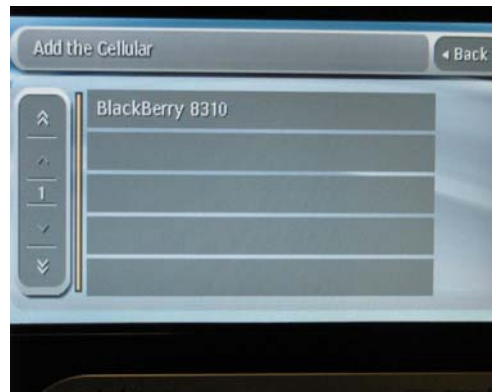

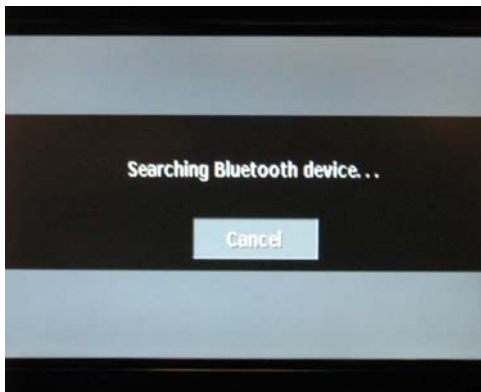

6. Select an empty slot to assign the new cellular phone. \* You cannot select an occupied slot \*
7. Touch **[Search]** or **[Wait]** key.

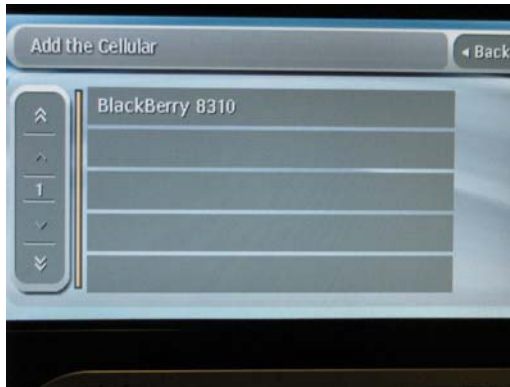

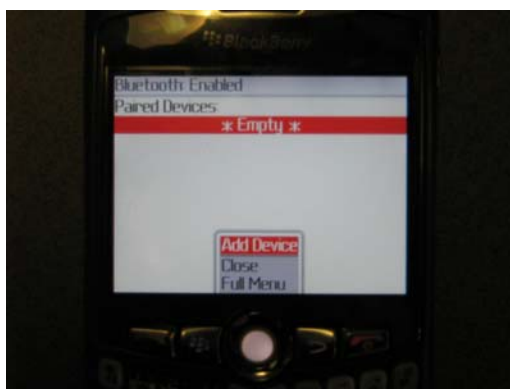

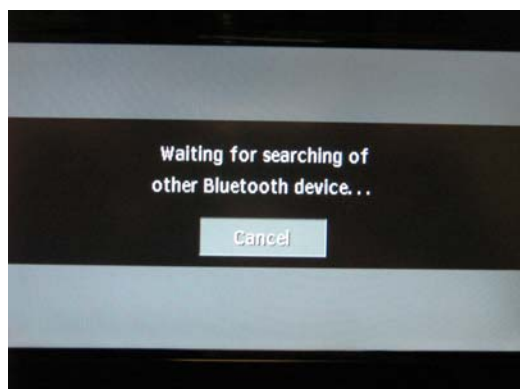

- **[Search]:** The system starts searching for a cellular phone.
- **[Wait]:** The system waits to be detected by a cellular phone.

In “**Search**” operation, the MAX685BT or VRX785BT will look for compatible Bluetooth connections. With this pairing method, the phone must be set as “discoverable” and must not be searching at the same time. The search can take a few minutes to find all compatible devices. Select the name of the cellular phone from the displayed list.

In “**Wait**” operation, the MAX685BT or VRX785BT will become “discoverable”. Perform the search via your cellular phone.
